SCOPE

The Frank Laboratory of Neutron Physics (Joint Institute for Nuclear Research) invites interested researchers to attend the International Conference on Condensed Matter Research at the IBR-2 reactor (CMR@IBR2 -2020) for discussion of recent experimental results, prospects of future research, development of IBR-2 instruments and neutron scattering techniques.

Neutron scattering research at the IBR-2 reactor (Frank Laboratory of Neutron Physics, Joint Institute for Nuclear Research) cover different fields of condensed matter physics, materials science, chemistry, biophysical, geophysical and engineering sciences. At present, over 200 experiments per year are performed at the IBR-2 instruments by scientists from more than 20 countries in the framework of the User Program.

The previous Conferences held in 2014, 2015 and 2017 attracted participants from Azerbaijan, Belarus, Bulgaria, Czech Republic, Germany, Estonia, Italy, Kazakhstan, Latvia, Moldova, Mongolia, Poland, Romania, Russia, Serbia, Slovak Republic, Ukraine and Vietnam.

Due to coronavirus pandemic worldwide, it is planned to organize the current CMR@IBR-2 Conference ONLINE.

TOPICS

The topics of the Conference will highlight results of interdisciplinary research and development of neutron instruments and techniques, including:

- ✓ Functional and nanostructured materials;
- ✓ Magnetic colloid systems;
- ✓ Layered magnetic nanostructures;
- ✓ Carbon nanostructures;
- ✓ Materials under extreme conditions;
- ✓ Soft condensed matter (biological nanosystems, lipid membranes, polymers);
- ✓ Lattice and molecular dynamics of materials;
- ✓ Texture and properties of rocks and minerals;
- ✓ Residual stresses in materials and products;
- ✓ Neutron imaging;
- ✓ Development of IBR-2 instruments;
- ✓ Development of neutron scattering techniques and detectors.
